DETAILED ACTION

1. This action is responsive to communications: Application filed on 08/16/01.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 18-38, 47-68, and 77-89 are drawn to accessing internet address, classified in class 715, subclass 501.1.
 - II. Claims 10-11, 39-40, and 69-70, drawn to accessing email address, classified in class 709, subclass 206.
 - III. Claims 12-17, 41-46, and 71-76, drawn to accessing geographical information, classified in class 701, subclass 209.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because accessing internet address does not require accessing an email address and accessing geographical information. The subcombination has separate utility of accessing email address and another separate utility of accessing geographical information.

Art Unit: 2176

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and Group III, restriction for examination purposes as indicated is proper.
